

Metal Free Anti Size Paste TC 100

Product description

Metal Free Anti Seize Paste TC 100 is designed for lubrication of screws and threaded connections operating under very high temperatures & withstands high pressure.

Applications

It can be used for lubrication and corrosion protection of threaded connections operating under high temperatures and corrosive atmospheres. Used on all types of components including pins, valve stems etc. It has an excellent load carrying capacity.

Advantages

Eliminates metal-to-metal contact • Protects surfaces from wear and friction • Against seizing, wear and stick-slip • Good corrosion protection & least breakout torque • Service temperature -20°C to +1400°C

Handling instructions

The paste is to be applied by brush, or grease gun. Fill only required quantity. Refer MSDS for more information about safe use, physical & health hazards.

Technical Properties

Parameter	Value	Unit	Standard
Appearance	Smooth paste		
Base	Mineral, other solid lubricants		
Colour#	White		
Penetration	310 - 340	mm/10	ASTM D 217
Drop point	None	°C	ASTM D 566
Service temperature	- 20 to + 1400	°C	

Minor colour variation is possible but product quality will remain same
